

TrialScope Atlas coming soon: Know what you need to disclose, when, where and why

Clinical trial sponsors are challenged to answer questions about disclosure performance. Often compliance is tracked and managed by affiliates compounding the problem. Disparate tracking tools being managed by separate teams around the world create pockets of valuable information that are inaccessible and often inaccurate. They obstruct a global view of disclosure compliance.

- Can you answer the question: **Am I compliant?**
- Do you know **how you are performing** against your current disclosure policies and existing law?
- Can you respond quickly to questions about **your disclosure compliance?**

Atlas enables clinical trial sponsors to quickly and accurately answer the question: Am I compliant? In doing so, Atlas reduces the risk of non-compliance by providing realtime access to consolidated, global disclosure compliance performance metrics.

See what needs to be disclosed next

Easy-to-read visuals illustrate what needs to be disclosed, overdue items and those due in the next 30 days. Users can plan and prioritize disclosure activities based on compliance deadlines and real-time statuses.

Report on your performance

Compliance performance dashboards offer a snapshot of global compliance. Users can see what was disclosed and what was missed and then compare performance against current policies and the law.

Library of global compliance rules

Compliance rules with links to sources for each rule are defined by industry experts and our user community. Pre-set rules based on industry knowledge are continually being updated and modified.

Add rules to match your policy

Add rules from the library that reflect policies and standard operating procedures, enabling greater transparency than the law requires.
