

The most trusted, comprehensive,
and reliable clinical trial intelligence.

Now powered by the industry's fastest,
most intuitive platform.

Having the right intelligence about ongoing clinical trials can mean the difference between success and failure in today's global pharmaceutical arena. The right data on competitive trial activity can help you make better and faster decisions about your clinical trial investment, strategy and execution – decisions that can keep you ahead of competition and reduce the risk of trial delays which can cost you millions.

Trialrove is the industry's leading authority for accurate, current and comprehensive clinical trials intelligence, providing a deep understanding of the competitive landscape in your focused areas of research, and supported by expert therapeutic area analysts.

Built by experts. Made for experts.

Design and run the next generation of clinical trials to achieve optimal outcomes with less risk and cost.

- Improve your protocol development by analyzing current trends in trial designs and outcomes
- Anticipate competitive threats and strategic direction and understand landscapes and opportunities
- Gather data on trial benchmarks and metrics, enrollment success, study timelines, targeted patient populations, and geographic distribution
- Research market trends and perform gap analyses
- Select the right countries for your trials by looking at current, past and future trial activity
- Understand the clinical strategies your competitors are using and their likely development timelines
- Save time with all the trial intelligence you need in a single, easy-to-use system
- Gain in-depth insight into the global trial landscape and competitive trends by disease

Delivering unparalleled trial coverage

265,000+

Trials Phase I to Phase IV

165+

Countries in all geographic areas

235+

Diseases in 8 major therapeutic areas

40,000+

Data sources

250+

Full-time experts tracking and analyzing trial activity

Citeline's unparalleled platform, industry leading data, and expert analyst team will enable you to:

- **Spend less time searching and more time planning:** Narrow and expand results with enhanced data filtering and our Boolean search panel
- **Customize data:** Tailor results tables and exports to see what you want, how you want
- **Seamlessly build searches across platforms:** Build your searches using criteria across Trialtrove and Sitetrove
- **Drive collaboration and transparency:** Share information and searches across your organization
- **Access from anywhere:** Access Citeline without limits - with individual accounts, users are not limited to access only within their company's IP addresses
- **Obtain a comprehensive overview of the clinical trial landscape:** Dynamic dashboards instantly update based on your search criteria
- **Assess the competitive environment and feasibility:** Robust analytical tools allow you to drill down into specific data such as disease, patient segment, inclusion/exclusion criteria, trial outcomes and trial timing
- **Evaluate trial profiles:** With robust details on attributes like treatment plans and disposition of patients, measuring criteria for patient classification and biomarkers, that are evaluated and updated by expert analysts
- **Ask the Analyst:** Your subscriptions provides direct access to our industry-leading analysts at no additional charge, who are available to answer any inquiries to ensure you are getting the most appropriate data and insights to meet your needs

Trialtrove also offers seamless integration with Sitetrove and Pharmaprojects, our site/investigator and drug development intelligence solutions.

We also offer API Solutions for Trials, Drugs, Sites and Investigators, which enable you to stream information directly from Citeline's R&D Intelligence databases into your own systems and embed Informa's quality datasets directly into your own organization's data and workflows.
